

NWCCF Dues Structure and Calculations

Dues are structured on a sliding scale, based upon average monthly student census data. To obtain census, aggregate part-time students into full-time configurations (e.g., two half-time students equals one full-time), add to that your full-time students and report the total as a twelve-month total. Divide that annualized amount by twelve to obtain your average monthly census.

Members with multiple locations: each school is recorded as a separate member.
