

NWCCF PRE-CONFERENCE WORKSHOP

CRUCIAL COVERAGE

The stakes are high. You figure you've got the right insurance until something happens. Are you confident you're protected for today's world?

Business can be unpredictable. One area where you can protect your school is with appropriate insurance coverage. "So what?" you say. "I've got insurance." Sure, but are you covered for today's business environment for proprietary schools? Maybe, but why not find out for sure?

During this important session you have the opportunity to learn of different types of coverage, why they are or are not appropriate for your school, why coverage has changed in the last few years, and examples of when the coverage was accessed by a school. This information will give you the facts to determine what insurance may actually save your school.

Highlights will include:

- School Professional (Malpractice) Liability
- Educators' Legal Liability
- Cyber Liability & Privacy Liability
- Employment Practices Liability
- Fiduciary Liability; and,
- Property, Liability, Works' Compensation, and Catastrophe Umbrella Liability

Presented by Robert Kretzmer, CIC, VW Brown Insurance Services
